Please find below and/or attached an Office communication concerning this application or proceeding.

		Application No.	Applicant(s)			
		09/439,348	FEBVRE ET AL.			
	Office Action Summary	Examiner	Art Unit			
		Sujatha Sharma	2684			
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
1)	Responsive to communication(s) filed on		1 30 1 00 1 01 1 1 1 1 1 1 1 1 1 1 1 1 1			
2a)⊠	This action is <b>FINAL</b> . 2b) ☐ This	action is non-final.				
3)□	3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.					
Dispositi	on of Claims					
4)□	Claim(s) is/are pending in the application	٦.				
-	4a) Of the above claim(s) is/are withdrawn from consideration.					
5)	5) Claim(s) is/are allowed.					
6)□	6) Claim(s) is/are rejected.					
7)	Claim(s) is/are objected to.					
8)[	Claim(s) are subject to restriction and/or	election requirement.				
Applicati	on Papers					
9)[	The specification is objected to by the Examiner					
10)☐ The drawing(s) filed on is/are: a)☐ accepted or b)☐ objected to by the Examiner.						
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).						
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).						
11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.						
Priority u	nder 35 U.S.C. § 119					
12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of:						
<ol> <li>Certified copies of the priority documents have been received.</li> <li>Certified copies of the priority documents have been received in Application No</li> </ol>						
3. Copies of the certified copies of the priority documents have been received in this National Stage						
application from the International Bureau (PCT Rule 17.2(a)).						
* See the attached detailed Office action for a list of the certified copies not received.

# Claim Rejections - 35 USC § 101

Claims 11-15 and 26-28 are rejected under 35 U.S.C. 101 because the claims are directed to a signal and data burst that contains non-functional descriptive material.

### Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-5,18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Scott in view of Dahlin [US 5,042082].

Regarding claims 1,18 Scott discloses a method for timing adjustment control method for an efficient time division duplex communications. Scott further discloses a method of receiving a burst transmission from a transceiver in a time slot and calculating a timing correction value to synchronize the transmission timing with the reference and transmitting the said correction value to the transceiver. See abstract and summary of invention, col.7, lines 52-65, col.11, 23-40. Scott however does not disclose a method of receiving a burst with a time slot indication indicating a time slot within which the burst was transmitted.

However, it is well known in the art a method of transmitting timeslot indication indicating the position of a time slot in the frame that carries control information as taught by the secondary

Application/Control Number: 09/439,348

Art Unit: 2684

reference Dahlin. See abstract, summary of invention, col. 7, line 36 – col. 8, line 45 and claim 21.

Therefore it would have been obvious to one with ordinary skill in the art at the time the invention was made to provide the above teachings of Dahlin to Scott for proper decoding of information at the receiver.

Regarding claims 2 and 5, Scott further discloses a method of transmitting to the transceiver a time slot allocation in a plurality of time slots. See abstract, column 7, lines 52-65, column 8, line 55 – column 9, line 24.

Regarding claim 3, Scott further discloses the plurality of time slots forming a sequence block whose length is greater than the maximum variation in the propagation delay. See column 7, line 52 – column 8, line 25.

Regarding claim 4 Scott discloses a method for timing adjustment control method for an efficient time division duplex communications. Scott further discloses a method of receiving a burst transmission from a transceiver in a time slot and calculating a timing correction value to synchronize the transmission timing with the reference and transmitting the said correction value to the transceiver. Scott further discloses a method where the transceiver sends the subsequent transmissions according to the timing correction value. See abstract and summary of invention.

3. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Scott [US 6,388,997] and Dahlin [US 5,042082] in view of Kronz [WO 99/00931].

Regarding claim 6, Scott as treated in claim 4 does not disclose a method of selecting the time slot randomly.

Kronz teaches a method of selecting a time slot randomly. See page 11, lines 7-18.

Application/Control Number: 09/439,348

Art Unit: 2684

Therefore it would have been obvious to one with ordinary skill in the art at the time the invention was made to include the above teachings of Kronz in Scott's invention in order to allow the user to send a reservation request for transmission of data signal prior to obtaining a time slot allocation for data transmission.

## Allowable Subject Matter

4. Claims 7-9 are allowed over prior art.

The closest prior art Scott [6,388,997] does not disclose a method determining a timing uncertainty value and transmitting the said value to the transceiver. Therefore the claims 7-9 are allowed.

### Response to Arguments

5. Applicant's arguments with respect to claims 1-6,10 and 18 have been considered but are most in view of the new ground(s) of rejection.

Regarding claims 11-15 and 26-28, the claims are for a signal and according to MPEP 2106 there is no utility associated with the signal and therefore constitutes non-statutory subject matter. However, the claim can be statutory subject matter if it is directed to a practical application of the electro-magnetic energy for example associated with a mobile device.

#### Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2684

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sujatha Sharma whose telephone number is 703-305-5298. The examiner can normally be reached on Mon-Fri 7.30am - 4.00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nay Maung can be reached on 703-308-7745. The fax phone numbers for the organization where this application or proceeding is assigned and for all official communications is 703-872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-3800.

Sujatha Sharma
